Preface:

Ways of Improving English Language

Learning a second language can be a very stressful task if you let it. Somehow, the words you learn in the books don't seem to apply very well to real life situations. However, to improve Your English Skill you need to *study grammar and do exercises* and also you need to improve the basic four skills of any language which are: Speaking; Reading; Writing; and Listening.

Learning English Language is a process that requires effort and time that doesn't happen overnight. Some people learn English easier than others and that depends on their capability, willingness and goals. There are so many ways and technologies which help to make learning English more flexible and easier. Choosing the best ways for you and using so many different methods will help you to learn English faster. Learning English needs patience and practice so that you will never learn English, unless you practice what you have learned and have a lot of

patience. Studying grammar and doing exercises are the most important ways to learn or improve your English.

Studying grammar makes you know the tenses of verbs, and how to talk and write correctly by using them. It isn't a whole process of learning English but it is a part of it. The majority of learners decrease the benefit of doing exercises and taking test. In fact, those ways are very important to improve your English, to know which level you are and to what extent you are progressing. Also their results will give you motivation to continue.

Speaking Skill:

Q: Is it possible to improve your speaking skill without visiting English speaking country?

Yes, it's possible because you can improve your English by many ways. Some learners believe that it's impossible to improve their speaking skill unless they visit an English speaking country, but that's not correct because you can improve your English by many ways. At the beginning, it's important to keep in your mind that you should "speak as much as possible, and make mistake as much as possible because when you know that you made mistake you know that you made progress." try to take advantage of all of situations that encounter you. For example, when you go to school you should use the opportunity to speak to your teacher by answering the questions, debating or speaking with other students. Also when you go shopping you have a wonderful opportunity to

practice your English by using a small talking by speaking with the Shop assistant, waiters and taxi driver. In addition, you can speak with your friends who speak English fluently. It's good to be in contact with native speakers for instance American, British, Irish and Australian who live in your city. When you talk to them don't be worried whether your expressions are right or wrong. They don't care about your grammar at all. They only care about what you say to them, but that doesn't mean that the grammar is not important.

Finally, don't be afraid to speak even if you make mistakes. There's saying "The person who never made mistake, never made any thing." So think of your mistake as something positive and useful.

Writing Skill:

Q: How to improve your Writing Skill?

To improve your writing skill, write everything you want. Write about your hobbies, interests or write e-mail to your pen friend. Good writing is more than just using correct grammar and suitable words. It is a process that helps you to develop your thoughts and some people believe that they are unable to write in English form, but that's wrong if they can think and say some sentences that mean they can think and put their thoughts in sentences on a paper.

Also, writing a personal journal is a good practice for you where it makes you write daily. Constant writing will make your writing more natural, and helps you to get more confidence where the saying was said “The more writing you do, the better you will get”. How to write correctly is an important element.

As I mentioned previously it is not only suitable words or correct grammar, but it is also planning, checking, revising and organization. Making a note and a rough plan for what you are going to write make the task much easier. Your first draft may have lots of mistakes and be incomplete. So, revise and revise and edit what you write, and make sure that your thoughts flow logically that will make your writing well developed and well organized.

Reading Skill:

Q: What's the benefit of reading books?

When you read a book, it shows you structures and expressions that you can use them in writing or speaking, it sees your grammatical roles naturally. And make you encounter new words. It's good to read at the right level for you to understand what you read. That's why you should know which level you are. When you find more than five new words pre page that means that you are not in the right level and you have to choose simpler. Read magazines, novels, short stories, articles, newspapers and

what so ever interest you in, to get a good acknowledge of the English language. Now you can practice reading skill wherever you go where you find it in shop's names, advertisements, and car's numbers.

Finally, to learn English and become proficient Read, Read, Read and Read even if you don't understand what you read." Have you forgotten what we said at the beginning "that learning English is gradual process and it doesn't happen overnight?"

Listening Skill:

Q: What're the materials that help you in improving your listening skill?

There are so many materials that can help you in improving your listening skill such as Radio, Broadcast, and CDs in English you won't learn any language without hearing it first, even your own language. When you were a baby, you didn't understand your language. Then, you got it by listening to your family, and gradually you learned to speak, learned to read and learned to write, but listening comes first. Listening and imitating are ways which help you to be proficient in English. At first time you listen to English, it will sound like "One big long word", but if you keep listening, the big word will be "smaller" and you will be able to know where the word begins and where it ends. It's good to choose the materials that interest you, where being interested will make learning more enjoyable and effective.

Eventually, to improve your English language you have to improve the four skills, as what is written above about how to improve those skills and its related topics, in order to use it in the right way.

Part One

Essay Writing

Elements of Essay Writing

Essay marking criteria can be broadly summarized as follows:

1. Introduction (topic thesis)
2. Each paragraph should have a topic sentence
3. All ideas should be related to the topic sentence and all topic sentences should relate to the topic thesis (hooking- unity and coherence)
4. Details should be clear
5. Conclusion (gives summary opinion preference-concluding statement)
6. Structure and word usage
7. Punctuation and Spelling
8. Knowledge and depth of reading
9. Relevance (the essay answers all parts of question)
10. Lay out and organization

Writing Tips:

There are some tips that can be very helpful to get started with any kind of writing and successfully complete an essay. These tips can help you be concise and easily convey your thoughts and ideas to any kind of audience. They also can be helpful to choose the topic, organize paragraphs and ideas, and find supporting evidence and appropriate words.

The following tips can be used for any kind of academic writing.

- Choosing the Topic
- Narrowing Down the Topic
- Organizing the Essay
- Organizing the Paragraph
- Active Verbs
- Choosing the Topic

If you have not been assigned a topic, then the whole world lies before you. Sometimes that seems to make the task of starting even more intimidating. Actually, this means that you are free to

choose a topic of interest to you, which will often make your essay a stronger one.

Define Your Purpose:

The first thing you must do is to think about the purpose of the essay you are going to write about. Is your purpose to persuade people to believe as you do, to explain to people how to complete a particular task, to educate people about some person, place, thing or idea, or something else entirely? Whatever topic you choose; it must fit that purpose.

Brainstorm Subjects of Interest:

Once you have determined the purpose of your essay, write down some subjects that interest you. No matter what the purpose of your essay is, an endless number of topics will be suitable.

If you have trouble thinking of subjects, start by looking around you. Is there anything in your surroundings that interests you? Think about your life. What occupies most of your time? That might make for a good topic. Don't evaluate the subjects yet; just write down anything that springs to mind.

Evaluate Each Potential Topic:

If you can think of at least a few topics that would be appropriate, you must simply consider each one individually. Think about how you feel about that topic. If you must educate, be sure it is a subject about which you are particularly well informed. If you must persuade, be sure it is a subject about which you are at

least moderately passionate. Of course, the most important factor in choosing a topic is the number of ideas you have about that topic. Even if none of the subjects you thought of seem particularly appealing, try just choosing one to work with. It may turn out to be a better topic than you at first thought.

Before you are ready to move on in the essay-writing process, look one more time at the topic you have selected. Think about the type of paper you are expected to produce. Should it be a general overview, or a specific analysis of the topic? If it should be an overview, then you are probably ready to move to the next step.

Once you have determined that your topic will be suitable, you can move on.

Here are a few guidelines to help you through the process:

1. Pick a topic that you are interested in. You will express yourself with more clarity and insight if you are interested in the topic that you are writing about.
2. You should pick a topic based on the assigned texts that you understood. While writing your essay, the majority of your energy will be focused on explaining and supporting your individual perspective and thesis, so it is important that you understand and feel comfortable talking about the primary (and

possibly secondary) material that will form the basis of your essay.

3. Select a topic that is challenging and thought provoking. You want to write about a topic that is interesting to you. Your essay should reflect your own individual and unique perspective on your chosen topic. It should not be a mere restatement of the already existing academic ideas on the topic. So, you should choose a topic that challenges you and allows you room to express yourself in relation to the primary source text, and the secondary sources (if they are applicable to your assignment).
4. Your topic should be specific enough that you can form an opinion about it, but general enough that you can find enough information to support your perspective and write a comprehensive and substantial essay.

Narrowing Down the Topic:

In narrowing down your topic, you should consider the following ideas:

1. Identify and define the main elements of the topic that you have chosen and look at the different ways that they can be applied to the primary material of your essay.
2. Pay attention to the length that the professor has assigned for the essay. The length can dictate the amount of information that you will be able to fit into your paper. The length will also

dictate the number of body parts that you will be able to use to support your thesis. As a general rule, the shorter the essay, the more limited and precise the topic will be. The longer the essay, the more space you will have to explore your topic and its implications and complexity.

3. In narrowing down your topic, pay attention to the specific aspects of the topic that are addressed within the primary text(s) for your essay and within class discussion. This will give you an indication of the specific ways that you can write about your source material. Professors are usually looking for a specific topic that addresses one of the central ideas of the material that you are studying. Choose the specific aspect that you feel runs through as much of the text as possible. This will afford you a topic that can be developed through the course of the primary source(s) to present your reading audience with a clearer view of the text or the ideas that dominate the material.
4. If you have any doubts about how you can find a specific aspect to address within the assigned topics, or if you are unsure as to which aspect you should focus on, do not hesitate to contact your professor for guidance. Often, this can save you a great deal of wasted effort and can help to focus your attention on a specific avenue for researching your topic.

Organizing the Essay:

1. Introductory Paragraph

Introductory paragraph consists of general points or attention grabbing details leading to the main idea. For instance, there are several means that effective writers use to "hook" their readers: beginning with an amusing or interesting anecdote, beginning with a question, beginning with a quotation, and beginning with a startling or paradoxical statement. The main idea is often written at the end of this paragraph in a thesis statement, which may also contain three or more reasons (written very succinctly) for supporting this main idea. Each of these reasons should be elaborated on in the body paragraphs that follow. Note: A thesis statement does not always come at the end of the introductory paragraph--some essays have the very first sentence as the thesis statement.

2. Body Paragraph (1)

Body Paragraph #1 often begins with a transition word or words like "First" or "The first of these reasons" and gives examples and/or details relating to the first supporting reason.

3. Body Paragraph (2)

Body Paragraph #2 often begins with a transition word or words like "Next" or "Second" or "Another reason" or "The second of these reasons" and gives examples and/or details relating to the second supporting reason.

4. Body Paragraph (3)

This often begins with a transition word or words like "Finally" or "Last" or "The final reason" and gives examples and/or details relating to the third supporting reason (which is often the strongest of the three supporting reasons).

5. Concluding Paragraph

This paragraph may begin with "In conclusion" or "To conclude" (although some markers find these somewhat mundane) or "Clearly" and often restates the thesis statement in different words. It may move from there to a general comment about life, or to a final important point, or to a suggestion about future action that may be needed. Some writers like to end with a relevant quotation, or end with a question, or end with a prediction or warning.

Another concluding technique is to end with some idea or detail from the beginning of the essay (thus bringing this idea full circle). Yet another means of concluding is to end with an allusion to a historical or mythological figure or event.

Organizing the Paragraph:

Make sure that each sentence flows logically. The traditional way to do this when writing an essay is to use connecting words or phrases, often conjunctions (linking words) such as "although", "because", "so", "moreover", or "therefore". In this way, you build your logic and arguments. These connections come in simple and complex forms.

Simple connections

(also, although, and, as, because, but, despite, first, however, if, next, now, second, then, therefore, third, until)

Although we sometimes need words to show the logic and connection between sentences and paragraphs, many connecting words make your style more complex and academic than necessary.

Complex connections

(accordingly, as you are aware, consequently, for this reason, furthermore, hence, in addition, in as much as, likewise, more specifically, moreover, nevertheless, nonetheless)

Use the connections to make sure your reader can follow the flow of information, ideas and arguments within sentences, from sentence to sentence and between paragraphs. But don't let too many connections creep into your writing and keep to the simple ones recommended.

Using Active Verbs:

Using active verbs is essential if you want to write with a direct authoritative style. Instead of using the impersonal passive verbs and third person viewpoint, you should write with strong, active verbs.

Whatever the subject of the essay, you can write with active verbs to make your writing style more direct, clear and forceful. If there's one piece of advice on writing style you should follow, it's to use active verbs throughout your essays.

Style Guide:

Abbreviations, addresses, capitalization, English grammar, Internet terminology, numbers, plurals, possessives, punctuation, spelling, and word usage).

Some English Transitional Expressions

Here are some of the most common transitional expressions in English, grouped according to the type of relationship shown by each.

1. Addition Transitions

and

also

besides

first, second, third

in addition

in the first place, in the second place, in the third place

furthermore

moreover

to begin with, next, finally

2. Cause-Effect Transitions

Accordingly

and so

as a result

consequently

for this reason

hence

so

then

therefore

thus

So that

3. Comparison Transitions

by the same token
in like manner
in the same way
in similar fashion
likewise
similarly
in other words

4. Contrast Transitions

but
however
in contrast
instead
nevertheless
on the contrary
on the other hand
still
yet

5. Conclusion and Summary Transitions

and so
after all
at last
finally
in brief
in closing
in conclusion
on the whole

to conclude
to summarize

6. Example Transitions

as an example
for example
for instance
specifically
thus
to illustrate

7. Insistence Transitions

in fact
indeed
no
yes

8. Place Transitions

above
alongside
beneath
beyond
farther along
in back
in front
nearby
on top of
to the left
to the right

under

upon

9. Restatement Transitions

in other words

in short

in simpler terms

that is

to put it differently

to repeat

10. Time Transitions

Afterward

at the same time

currently

earlier

formerly

immediately

in the future

in the meantime

in the past

later

meanwhile

previously

simultaneously

subsequently

then

until now

Part Two

Reading Comprehension Passages

(1)

Universities

Students working for their first degree at a university are called under graduates. When they take their degree we say that they graduate, and then they are called graduates. If they continue studying at university after they have graduated. They are called post-graduates.

Full-time university students spend all their time studying. They have no other employment. Their course usually lasts for three or four years. Medical students have to follow a course lasting for six or seven years. Then they graduate as doctors. In Britain, full-time university students have three terms of about ten weeks in each year. During these terms they go to lectures or they study by themselves. Many students become members of academic societies and sports clubs and take part in their activities. Between the university terms they have of course they can use them to study at home.

Some universities, like Oxford and Cambridge in England, are residential. This means that during the university terms the students live in a university college

or hostel or in lodgings chosen from an official list. The university and college buildings are often very old, and amongst them are fine examples of ancient architecture. Other universities are non-residential. Some of the student at these universities can live in a university hostel, but many live at home or in lodgings and have to travel daily to their lectures. Large cities often have universities of this kind. Sometimes the students have to spend quite a lot of time on their journeys, so they cannot join in student activities as easily as students in residential universities can.

Full-time students are also called internal students, because they spend all their time at university. There are also external students who cannot attend the university full-time but who are studying for its examinations. They are part-time students. They have to do other work during the day, usually to earn their living, and they study in the evening. External students are often older than full-time internal students. Sometimes they can attend lectures in the evening, but many of them have to study by correspondence. They write at home the work that is set by their tutors. Then they have to post this work to their

tutors, and the tutors post corrections and advice back to them. In some countries, 'Universities of the Air' can now help students to gain degrees. After special lectures on radio or television, these students too have to spend set work for correction by correspondence. However, for a few weeks each year they can attend special vacation courses at universities.

For admission to any degree course, a student has to pass qualifying examinations. In Britain there are not enough places for every secondary school student, so these examinations are competitive. This means that only the students with the highest marks can gain admission. However, a few older people are able to gain admission without the full qualifications, if the university thinks that they are suitable candidates.

(2)

Football

The American type of football was developed in the 19th century from soccer and rugby football. Played by professionals, amateurs, college, high school, or young children, football in America is one of the most popular sports. It attracts millions of fans each fall and people are very supportive of their favorite teams. The origin or beginning of football may have been a game played by the ancient Greeks called Harpaston. In this game, there was no limit to the number of players. The ball was kicked, thrown, or run by the players and the object was to move a ball across a goal by kicking. The football playing field of today is rectangular in shape and measures 100 yards long and 53.5 yards wide. White lines are painted on the playing field to mark off the distances to the end zone.

The game is divided into four quarters, each fifteen minutes long. The first two quarters are known as the first half. There is a rest period between the two halves which usually lasts about fifteen minutes. Each team has eleven

players. Each team has offensive players (play when the team has possession of the ball) and defensive players (play when the other team has possession of the ball). Players are required to wear protective equipment to help keep the body safe during the game. Helmets are worn to protect the head and face area. Pads are worn to protect the shoulders, arms, and legs. Protective equipment must be worn because of the body contact players have during the game. Officials supervise the game and are considered to be very important to the game of football. They carry whistles and flags and make certain that the rules of the game are followed during the game.

The football is made of leather and is brown in color. It is shaped much like an oval and has white rings near each end of the football. These rings help the players see the ball when it is thrown or someone is running with it. The eight stitches on the top of the football help players to grip or hold the ball when throwing or passing.

The most famous football game of the year is the Super Bowl that is played in January or February. It is televised around the world and is watched by millions of people each year.

ANSWER EACH OF THE FOLLOWING:

1. What is the most famous football game each year?
 - a. the Georgia-Florida game
 - b. the Super Bowl
 - c. the Alabama-Auburn game
 - d. the Army-Navy game
2. What shape is the football?
 - a. rectangular
 - b. circle
 - c. triangle
 - d. oval
3. Why are there white rings on each end of the football?
 - a. to help players see the ball
 - b. to make it look nice
 - c. to help players score
 - d. to help players run
4. Players need protective equipment during the game to
 - a. to make their uniforms fit
 - b. to keep the body safe
 - c. to see the ball
 - d. to make touchdowns
5. Who plays American football?
 - a. professional players
 - b. college players
 - c. high school players
 - d. all of these

6. What do officials do during the game of football?
- a. watch the game
 - b. take up tickets
 - c. make sure the rules are followed
 - d. kick the ball
7. Which of the following is NOT true?
- a. The football field is rectangular in shape.
 - b. The field measures 100 yards long and 53.5 yards wide.
 - c. The white lines are used to keep players safe.
 - d. The rest period between at the half lasts about 15 minutes.
8. The word grip means to
- a. hold tightly
 - b. score during the game
 - c. end zone
 - d. supervise the game

(3)

Spiders

Spiders are not insects as many people believe. They belong to a class of animals called arachnids. Spiders have eight eyes, four pairs of segmented legs, and can grow a new leg if they lose one. They do not have antenna or wings. A spider's body can be divided into two sections. The sections are the abdomen and the cephalothorax. The legs, eyes, and mouthparts are in the cephalothorax section. Most spiders have poison glands and fangs in their jaws, which they use to inject poison into insects. This poison is called venom. Venom can paralyze an insect allowing the spider to eat the insect as food.

Spiders can live almost anywhere in the world. Some like very humid or hot temperatures and some like places that are very dry. Some spiders prefer to live underground and others live in trees. We have all seen spiders that prefer to live in our houses.

These amazing animals usually have six fingerlike silk glands called spinnerets located beneath their abdomen. The silk comes from inside the spider's body as a liquid that is thicker than water. A spider uses this silk to make a web by squeezing the silk out of two small holes at the back of its body. These small holes are called spinnerets. At the time the silk hits the air, the silk dries into a line that looks like a long string of hair. Spiders use this silk as draglines to hang onto as the wind blows it through the air. The spider can crawl up or down on this dragline if the wind takes it somewhere it doesn't want to be. Young spiders and adult male spiders like ballooning and can release long silken threads that float or ride in the wind to new areas.

There are about 30,000 different types of spiders known to scientists. Most of them are very tiny animals that help us by eating insects. The next time you are out in the yard and see a spider, take a few minutes to watch this most interesting animal.

ANSWER THESE QUESTIONS ABOUT SPIDERS:

1. Where are the poison glands located on the spider's body?
 - a. cephalothoraxes
 - b. eyes
 - c. jaws
 - d. none of these
2. Spiders prefer to live in
 - a. hot temperatures
 - b. dry places
 - c. trees
 - d. all of these
3. Which of the following is true?
 - a. Spinnerets are used by the spider to see things.
 - b. Spiders belong to a class of animals called arachnids.
 - c. The silk spiders make is thinner than water.
 - d. Spiders have antenna and wings.
4. How is venom used by the spider?
 - a. to paralyze insects
 - b. for ballooning
 - c. as a dragline
 - d. none of these

5. Which of the following is NOT true?
- a. The legs, eyes, and mouthparts of the spider are located in the abdomen section.
 - b. Spiders have eight eyes and four pairs of segmented legs.
 - c. Spiders can live almost anywhere in the world.
 - d. Most spiders have fangs and poison glands located in their jaws.
6. How do spiders help us?
- a. by making webs and draglines
 - b. by growing new legs
 - c. by eating insects
 - d. none of these

(4)

Jada and Jessie

Jada and Jessie are twins. They were born on August 5, 1992. They are ten now and in the fourth grade. Jada and Jessie do everything together. They are in the same class. They dress alike. They look the same. People always get them confused. This really makes Jada and Jessie laugh. Teachers always get them mixed up at school. Even their father has trouble telling them apart.

Their mother doesn't, though. She always knows which twin is which. Jada and Jessie often try to confuse her, but it has never happened. Their older brother, Jared, is fifteen. He never knows which one is which. He doesn't even try. Jada and Jessie have the same friends. Their friends always mix them up. It doesn't matter to Jada and Jessie.

One day, their father told their mother to get one of them a different haircut, so that he could tell them apart. Jada and Jessie were horrified. They didn't want to look different. They liked looking the same. Their mother came to the rescue, and refused to make them cut their hair. The girls were happy just the way they were and

didn't want to change. Their dad just shook his head. He would have to stay confused. Jada and Jessie didn't care. They knew which one was which, and that was all that mattered.

ANSWER THE QUESTIONS:

1. How old are Jada and Jessie in this story?
 - a. ten
 - b. twelve
 - c. eight
 - d. fifteen
2. Who in their family could tell them apart?
 - a. their brother
 - b. their dad
 - c. their mom
 - d. no one
3. Who in the family wanted them to look different?
 - a. their mom
 - b. Jared
 - c. their dad
 - d. Jada and Jessie

4. Who came to their rescue when they were supposed to get different haircuts?
 - a. their dad
 - b. Jared
 - c. their friends
 - d. their mom

5. Jada and Jessie don't care if people can't tell them apart. Why do you think they feel this way?
 - a. Jada and Jessie are in the fourth grade.
 - b. Jada and Jessie know their differences.
 - c. Jada and Jessie like wearing blue dresses.
 - d. Jada and Jessie like making Jared mad.

(5)

Ana's Great Day

It was a Tuesday morning in April. Ana got up early. She was going to wear her lucky blue skirt to school. She really liked that skirt. She had a new shirt to match it, and new shoes, too. After Ana got dressed, she went into the kitchen, where she could smell bacon. Ana's father was making bacon and toast. Ana loved bacon in the morning.

Ana's mother was getting ready for work. Ana's mother is a teacher at Ana's school. Ana is in the second grade, and her mother teaches fourth grade.

Ana was excited about going to school. Her class was going to take a test to see how much they had learned so far that year. Ana couldn't wait to get to school. Ana sharpened her new pencils for the test. She was going to do her very best on that test. Ana loved school, and she liked to make good grades.

Ana ate her breakfast, and then she and her mother went to the school. Ana went straight to her classroom. Her teacher, Ms. Browner, was already there. It was fun

to be in Ms. Browner's class. She was a great teacher. Ana's classmates arrived. Ms. Browner called roll, and then they started the test. Ana tried to remember all the things her teacher had taught her that year, and tried very hard to do everything right on the test.

The test took over an hour. After the test was over, the class played outside for a long time. Then they ate lunch. After lunch, they watched a funny movie, and then drew pictures until it was time to go home. It was a great day!

ANSWER THE QUESTIONS:

1. What grade was Ana in?
 - a. first
 - b. second
 - c. third
 - d. fourth
2. What did Ana like to eat in the morning?
 - a. eggs
 - b. bacon
 - c. oatmeal
 - d. cereal

3. Why was Ana excited about going to school?
 - a. They were going on a trip.
 - b. They were having a party.
 - c. They were taking a test.
 - d. They were going to paint.
4. What did Ms. Browner do before they took the test?
 - a. She went to the office.
 - b. She called roll.
 - c. She went home.
 - d. She wrote a note to Ana's parents.
5. What did the children do outside after the test?
 - a. rode bikes
 - b. drew pictures
 - c. played
 - d. watched a movie

(6)

Fred Carey

One day, Fred Carey went to the bank, where he had to collect some money to pay the rent. The bank had just started a new system of queuing; instead of having a separate queue at each clerk's window, there was a rope behind which all the customers had to wait and the first person in the queue could only pass the rope when one of the clerks became free.

On this particular day, Fred found that there was a long queue of people waiting patiently for their turn to come. It was lunchtime, so the delays were even longer than usual, because people who had been too busy working earlier in the day to go to the bank were there, and also because a few of the bank clerks were away having lunch.

While Fred waited, he filled in a cheque in his cheque book, which he then signed and tore out, ready to give to the clerk. Then he looked around him as the queue moved gradually forward. He noticed one man in front of

him who was wearing a torn cloth cap. He seemed very old and poor, and Fred felt quite sorry for him.

When it was Fred's turn to go to one of the bank clerks' windows, he noticed that he was quite close to the old man, who had just gone to one of the other windows. Fred saw that he was holding a cheque for £6.00 in his hand. The old man gave the cheque to the clerk, whom Fred had often seen in the bank, and the clerk asked him how he would like the money. The old man was a little deaf and did not hear the clerk at first. Fred therefore leaned over and said to him loudly but kindly, 'Excuse me, but the clerk would like to know how you'd like your money.'

The old man, who was very surprised to be spoken to by a stranger in this way, turned to Fred and said, 'What?' The clerk,' Fred repeated slowly and even more loudly, 'wants to know how you would like your money.'

The old man thanked Fred for his kindness, then he turned back to the clerk and said, 'I'd like ten 50p coins, five 10p coins, three 5p coins, twelve 2p coins and eleven 1p coins, please'.

Fred was surprised and amused when he heard this list, and he wondered what the busy clerk would say.

The clerk sighed and then said politely, ‘Would you like coins of any special dates, sir?’

Questions:

1. Why did Fred go to the bank?

.....

2. Why was there a long queue there?

.....

3. What did the bank clerk ask the old man?

.....

4. Why did Fred speak to the old man?

.....

5. How did the old man want his money?

.....

6. Why did Fred think the clerk might be impatient with the old man?

.....

(7)

Man in Society

Men usually want to have their own way. They want to think and act as they like. No one, however, can have his own way all the time. A man cannot live in society without considering the interests of others as well as his own interests." Society "means a group of people with the same laws and the same way of life. People in society may make their own decisions, but these decisions ought not to be unjust or harmful to others. One man's decisions may so easily harm another person.

For example, a motorist may be in a hurry to get to a friend's house. He set out, driving at full speed like a competitor in a motor race. There are also other vehicles and also pedestrians on the road. Suddenly there is a crash. There are screams and confusion. One careless motorist has struck another car. The collision has injured two of the passengers and killed the third. Too many road accidents happen through the thoughtlessness of selfish drivers.

We have governments, the police and the law courts to prevent or to punish such criminal acts. But in addition, all men ought to observe certain rules of conduct. Every man ought to behave with consideration for other men. He ought not to steal, cheat, or destroy the property of others. There is no place for this sort of behavior in a civilized society.

Men in a free society have certain privileges. The government and the police do not watch all their movements. Officials do not dictate to them everything they may or may not do. Men in a free society may think as they please. They may even choose their own government. In return for these privileges they ought not to act selfishly. They ought to respect the rights of others.

Answer these questions:

1. What do we mean by society?

.....

2. Why can men not always have their own way?

.....

3. What actions should not be done in a civilized society?

.....

4. Why do accidents often happen?

.....

(8)

The Adventures of a Shilling

JOSEPH ADDISON

Joseph Addison (1672-1719) was a scholar, traveler and essayist. He was a close friend of Swift and Steele, but quarreled with the latter before his death. In the following essay, Addison describes how a shilling was made and was used.

It seemed to me that the shilling that lay upon the table raised itself upon its edge, and turning. The face towards me, opened its mouth, and in a soft, silver sound, gave me the allowing account of his life and adventures.

I was born (said he) on the side of a mountain, near a little village. I made a voyage to England with Sir Francis Drake. I was, soon after my arrival, taken out of my old dress, refined, and put into, the English fashion, with the face of Queen Elizabeth on one side, and the arms of the country on the other. Being thus provided, I found in myself a wonderful desire to wander, and visit all parts of the new world into which I was brought. The people very much liked me, and moved me so fast from

hand to hand, that before I was five years old, I had traveled into almost every Corner of the nation.

"But at the beginning of my sixth year, to my unspeakable sorrow, I fell into the hands of a miserable old fellow who shut me in an iron chest, where I found five hundred, more of my own sort, who were in the same prison. The only relief we had was to be taken out and counted over in the fresh air every morning and evening.

After an imprisonment of several years, we heard somebody knocking at our chest and breaking it open with a hammer. This we found was the old man's heir, who, as his father lay dying, was good enough to come to set us free. He separated us that very day. What was the fate of my companions? I do not know: as for myself: I was sent to a shop for some wine. The shopkeeper gave me to a woman, and the woman gave me to a butcher.

In this way I passed merrily through the world; for, as I told you before, we shillings love nothing so much as traveling.

I sometimes fetched in a piece of meat, and sometimes a book.

'In the midst of this pleasant progress which I made from.

(9)

Tourists

Most countries in the world now welcome tourists because of the money they bring in. Many countries make great efforts to encourage tourism, and many also depend on what they earn from it to keep their economies going.

People who like adventure will even try to visit countries where travel is difficult and costs are high. Companies regularly arrange trips through the Sahara Desert, or to the Himalayan Mountains for whoever enjoys such trips, but the numbers of visitors are small. Most tourists try to choose whichever places have fairly comfortable, cheap holes, quite good food, reasonable safety, sunny weather and plenty of amusements or unusual things to see. Their choice of a place for a holiday also depends very much on when they can get away; it is not very pleasant to go to a place when it is having its worst weather.

One of the big problems for a nation wishing to attract a lot of tourists is the cost of building hotels for them. Building big hotels swallows up a lot of money, and many of the countries that need the tourists are poor.

What they spend on building has to be borrowed from foreign banks. And sometimes the money they can afford to borrow produces only chains of ugly hotels wherever there are beauty spots that are supposed to attract the tourists.

Another problem is that more and more big international companies are building hotels all over the world, so that the profits from a hotel often do not stay in the country in which it has been built. And there is also the question of training staff; teaching them foreign languages, how to cook the kind of food that foreign tourists expect, and so on. In many countries, special colleges and courses have been set up for this.

Crime can also be a problem. Seeing tourists who seem to be much richer than themselves, the local inhabitants are often tempted to steal from them. Sometimes tourists resist and get killed, and then other tourists refuse to come to the country. But an even greater problem in many countries is the effect that the sight of foreigners has on the local population. A man who lives in a very small house, owns almost nothing, works very hard for his living and has very strong rules about

modesty in dress and not drinking alcohol sees foreign tourists rejoicing in what to him is great luxury, owning radios, wearing very few clothes and drinking a lot of course, he either feels envy for them or thinks them shameless.

Tourists, too, often feel shocked by the different customs and habits that they see around them. They refuse the local food, and insist on having only what they eat back home. They say that travel broadens the mind; but it is doubtful whether this is so; often, it narrows it.

Comprehension Check

- Look at these questions. Find the correct answers.

Then write the questions and the answers:

1. What would happen to some countries if tourism stopped?
2. Do many people like adventure?
.....
3. Why do some people not go to a place for a holiday although they like it?
.....
4. Why do countries sometimes spoil their beauty spots?
.....
5. Where do the profits from some hotels unfortunately go?

(10)

Worrying

There are at least two precipitating causes of anxiety conflict and stress. As an example of the former, we can rarely predict the precise consequences of what we do, but we are blessed (or cursed) with the intellectual capacity to anticipate the advantages and disadvantages which may accrue from any action we may be contemplating. Very commonly we are faced with a choice between several courses of action, all of which have pros and cons. This state of affair- in psychological jargon, multiple approach avoidance conflict – accounts for a great deal of our worrying: worrying, that is, about what to do.

The other major source of worry is the dreadful things which may happen or have happened to us to those we care for. Among the most stressful of these are death, illness, loss of work, money problems, marital problems and retirement. Such worries have a rational basis, but we are curiously irrational in the way we pursue them. For example, fear of death is as strong among young adults as among the elderly and it does not seem to be reduced by

any sort of religious faith, including the belief that there is life after death. It is equally surprising that objective measures of anxiety suggest that we are as worried the hour before having a tooth filled as when we face major surgery.

Answer the following questions:

1. What are the two causes of anxiety?
.....
2. What is meant by multiple approach- avoidance conflict?
.....
3. How can you obtain temporary relief from anxiety?
.....
4. What happens if coping behaviors fail to reduce anxiety?
.....
5. Who are more likely to have nervous breakdown: old people or young people?
.....
6. Are there people who are born anxious?
.....

Form nouns from:

predict

precise

anticipate

lose

retire

pursue

From adjectives from:

anxiety

intellect

dread

stress

fear

religion

(11)

Christopher Columbus

Not much is known for certain about the early life of Christopher Columbus. According to most accounts, he was born in 1451 in Genoa, Italy. His brother Bartholomew was a chart maker in Lisbon, Portugal. Columbus probably studied chart making with his brother.

Columbus believed that the world could be circumnavigated (traveled around), and he wanted to travel the seas to prove it. He was very interested in exploration. Although most people of Columbus' time knew that Earth was round, not many believed that it was possible to get all the way around it by boat. Among other things, it was believed that a ship would run out of supplies before it reached land again.

At that time, spice merchants were looking for a new route to Asia. Asia was a large trading area, but it was very difficult to reach by traveling east across land. Columbus believed that it would be possible to reach Asia by traveling west across the sea. Columbus requested

support from many people to help him travel the seas. Finally, Queen Isabella and King Ferdinand of Spain granted his request, and gave him the money he needed for his voyage.

On August 3, 1492, Columbus and ninety men set sail on the Santa Maria along with two other ships, the Niña and the Pinta. The voyage was hard and many men were sick and tired. On October 11, at ten o'clock at night, they finally saw land. Since Columbus thought they had reached the Indies (in Asia), he and his crew expected to see people that were Indian. Even when they found out that they were not in Asia, they were happy to have found a new place that they could trade with.

Columbus named the area where they landed San Salvador, and claimed the area for Spain. Columbus continued to explore the New World and made several other voyages.

Today Columbus Day is observed in the United States on the second Monday in October. Banks and government offices are closed to honor the explorer who is believed by many to be the first European to have discovered the New World of the Americas.

Answer these questions (Choose):

1. Columbus went on his famous voyage because ...
 - a. he wanted to be a sailor.
 - b. he believed the world could be traveled all the way around.
 - c. he liked Queen Isabella and King Ferdinand of Spain.
 - d. he wanted to discover America.
2. Which of the following is NOT true?
 - a. Columbus was Italian.
 - b. Columbus was a Spanish prince.
 - c. Columbus thought he had arrived in Asia.
 - d. none of these
3. Which ship did Columbus sail on?
 - a. the Niña
 - b. the Santa Maria
 - c. the Mayflower
 - d. none of these
4. About how long did it take Columbus to reach the new land?
 - a. three years
 - b. three months
 - c. two months
 - d. none of these

5. Which of the following IS true?
- a. Columbus discovered a new route to Asia for the spice merchants.
 - b. Columbus was a sailor and explorer.
 - c. Columbus believed the world was flat.
 - d. both b and c
6. Who probably most influenced Columbus' interest in sailing and exploring?
- a. the King and Queen of Spain
 - b. his father
 - c. his brother
 - d. none of these
7. Columbus Day is observed in the United States on
- a. the third week of October
 - b. October 31st
 - c. the second Monday in October
 - d. none of these

(12)

John Andrews

John Andrews had had to wear glasses ever since he was a small boy, so, shortly before the time when he was to leave school, his parents suggested that he might train to be an optician, so that he could help other people with their eyes.

John did not have strong feelings about what he wanted to do, so he agreed and started a course of training with the intention of becoming an optician. He found the work interesting, and did not have any trouble in qualifying at the end of the course. The next problem was to find a steady job.

John looked at the advertisements in suitable journals, applied for a number of the situations offered, and at last managed to get one in the town where he lived, so one Monday morning he set off by bus for his new work. The owner of the optician's shop where he had been accepted was an old man, and he had another assistant and a secretary.

The first time that John tested a customer's eyes, the owner of the shop watched carefully to make sure that he knew what to do, and he was very satisfied with everything that John did, except that John did not know anything about prices. 'We'll discuss that at lunchtime,' he said to John quietly.

While John had been studying at college, he had read several articles and letters in the newspapers about arguments over the cost of glasses. The government had been accusing opticians of charging far too much for them, and had been threatening to bring in laws to control their prices, so John was curious to know what the owner of the shop would have to say about them. At lunchtime, when they closed for an hour, the owner of the shop said to John, 'Now, we'd better have a chat with reference to our charges for glasses, so that you know what to say to customers. In this shop we expect everyone to pay a fair price for what he or she gets, so when you have tested someone's eyes, and they have chosen the kind of lenses and frames they would like to have, and they want to know how much they will cost, you should say, for example, "f54". While you are saying this, you should

watch the customer's face carefully, and if he or she does not seem frightened by this price, you should add, "That's the price of the frame. The lenses cost f54 more" 'If the customer still does not look as if he or she is worried, you should add, "'for each lens".'

Exercise:

- Read these questions. Find the correct answers. Then write the questions and the answers:

1. Why was it particularly suitable for John to train to be an optician?

.....

2. What gave him some trouble?

.....

3. What did the owner of the shop watch John's work at first?

.....

4. What did the owner want to discuss at lunchtime?

.....

5. Why was John curious to know what the owner would say?

End of Part Two

Part Three

Advanced Reading Passages

Passage 1:

During a relatively short period at the end of the nineteenth century, George Eastman was instrumental in transforming the labor-intensive and expensive art of photography into a popular and affordable hobby. The phenomenal success that Eastman had in these early years of his business was in most part due to the successful innovation that opened up photography to the population as a whole.

While Eastman was working as a bookkeeper in a bank in Rochester, New York, he spent his leisure time working on a process for making dry plates. By 1880, Eastman had perfected the process. Without leaving his job at the bank, he established the Eastman Dry Plate Company. The business grew so quickly that by 1881 Eastman had given up his job at the bank in order to develop the business.

Changes to simplify the process of taking photographs followed one after another. In 1884, Eastman took a step that made photography a less cumbersome process: he replaced the unwieldy glass plates with paper-backed roll film. Four years later, the hand-held Kodak was introduced. This camera came loaded with enough film to take a hundred photographs and produced round-shaped pictures approximately six centimeters in diameter. Something that made this camera very popular was that a photographer did not need to know how to develop film in order to use it; after using up the film, the photographer sent the loaded camera back to the factory, where the photographs were processed and the camera was reloaded and returned to its owner. In 1892, another innovation, film that could be loaded in the daylight,

allowed amateur photographers to load their own film successfully.

1- The word "affordable" in paragraph 1 is closest in meaning to

- A- costly
- B- priceless
- C- valued
- D- cheap

2- How did photography apparently change at the end of the nineteenth century?

- A- It required more labor.
- B- It began costing more.
- C- It became more widespread.
- D- It became more of an art.

3- According to the passage, what contributed to Eastman's incredible success?

- A- His ability as a photographer
- B- His ability to come up with new ideas
- C- A phenomenal amount of luck
- D- His ability to relate to the population as a whole

4- It can be inferred from the passage that Eastman kept his job at the bank for how long after he established his own company?

- A- One year
- B- Two years
- C- Four years
- D- Twelve years

5- The expression "given up" in paragraph 2 is closest in meaning to which of the following?

- A- Quit
- B- Handed in
- C- Gotten
- D- Misunderstood

6-It can be inferred from the passage that, prior to 1884, photography

- A- used paper-backed film
- B- required glass plates
- C- was possible with a hand-held camera
- D- was a simple process

7- Where in the passage does the author indicate what product came on the market in 1888?

- A- The second sentence in paragraph 1
- B- The first sentence in paragraph 2
- C- The third sentence in paragraph 3
- D- The sixth sentence in paragraph 3

8- To get the film for the hand-held Kodak developed, the photographer

- A- developed the film at home
- B- took the film to a local film developer
- C- mailed the film to the factory
- D- sent the camera, with film, to the factory

9- Who apparently loaded the film into a hand-held Kodak?

- A- The camera's owner
- B- An amateur photographer
- C- A factory worker
- D- A professional photographer

10- The paragraph following the passage most likely discusses

- A- another company started by Eastman
- B- the effect of ~daylight-loading film ~on amateur photography
- C- the predecessor to the hand-held Kodak developed by Eastman
- D- further innovations in professional photography

Passage 2:

From ancient times, amber has had a strong allure, with its warm color, resinous feel, translucence, and curious flecks trapped beneath its surface. As early as the Neolithic period, people were carving amber into figures and symbols which were worn as special charms or used for adornment. Today, however, amber has attracted a new audience, scientists who are interested in studying the unusual flecks. These tiny spots in amber are of interest to scientists because many are actually preserved organisms inside the amber.

Though often used in jewelry, amber is not a precious stone, a semi-precious stone, or even a mineral. Instead, it is the fossilized resin, or gum, from trees. It differs from other fossils, however, in that other fossils are generally mineral replacements of original structures, while amber is entirely organic; i.e., it is derived from living organisms. In the millions of years that it takes for amber to form, its composition has stayed substantially the same as that of the resin that formed it.

Large deposits of amber in the Dominican Republic and Mexico are 25 to 30 million years old, and the eastern Baltic region boasts huge deposits of amber that are 15 million years older. The extreme age of amber, coupled with its organic make-

up, has caused amber to become the focus of recent scientific interest. Modern technology has been used to determine that the tiny organisms caught in amber have been preserved to a remarkable degree due to the organic nature of the amber; soft tissue, cellular detail, and DNA of ancient organisms have all been preserved, providing information that cannot be obtained from other fossils of that age.

1-In the Neolithic period, how was amber primarily used?

- A- It was used to calculate figures.
- B- It was worn as clothing.
- C- It was used to provide ~ornamentation.
- D- It was used to carve wood.

2- The word "flecks" in paragraph 1 is closest in meaning to

- A- Stripes
- B- Spots
- C- Holes
- D- dents

3- According to the passage, amber is

- A- a precious stone
- B- a semi-precious stone
- C- a mineral
- D- hardened gum

4- The word "organic" in paragraph 2 is closest in meaning to which of the following expressions?

- A- From living material
- B- Made of stone
- C- Filled with minerals
- D- From fossilized wood

5- The pronoun "that" in paragraph 2 refers to

- A- Amber
- B- Composition
- C- Resin
- D- Dominican Republic

6- According to the passage, what has happened to the composition of amber in the millions of years of its formation process?

- A- It has changed from inorganic to organic.
- B- It has become unlike the resin that formed it.
- C- It has taken on the composition of other types of fossils.
- D- It has remained basically unchanged.

7- Approximately how old are the deposits of amber in the eastern Baltic region?

- A- 15million years old
- B- 25 million years old
- C- 30 million years old
- D- 45 million years old

8- The word "coupled" in paragraph 3 is closest in meaning to

- A- Married
- B- Joined
- C- Doubled
- D- replaced

9- Why has recent scientific interest been focused on amber, according to the passage?

- A- It was carved by Neolithic people.
- B- It is extremely old.
- C- Its composition is inorganic.

D- It can be used to preserve organisms.

10- The word "caught" in paragraph 3 is closest in meaning to

A- Lost

B- Mixed

C- Trapped

D- Woven

11- The passage mentions that all of the following remnants of ancient organisms have been found in amber EXCEPT

A- soft tissue

B- detailed information from cells

C- DNA

D- living material

Passage 3:

Whereas planetary orbits tend to be nearly circular, those of comets are elliptical`like stretched-out rubber bands. The reappearance of a comet is proportional to the length of its orbit. Halley's comet completes its trek approximately once every 75 years, whereas the lesser magnitude Enke comet makes its rounds in a mere 3.3 years. Other comets, such as Hyakutake (1996), have such elongated orbits that they may pass through the solar system only once every thousand years or more.

There are three constituent parts of a comet: the nucleus, the coma, and the tail. The nucleus of a comet is composed of primarily silicate dust particles embedded in ice; hence, the comet has been informally dubbed a "dirty snowball." Surrounding the nucleus is a vaporous coma of dust and gases that extends for tens of thousands of miles.

When a comet approaches the Sun, its tail develops rapidly. Blasted by solar winds and light pressure, gases and dust are forced away from the coma, forming a forked tail. A comet's tail always points away from the Sun, somewhat analogous to long hair being blown back by a wind. The tail increases in length as the comet approaches perihelion, its closest distance to the Sun. In the 1910 appearance of Halley's comet, the tail was calculated to be some 150 million miles in length. As a comet retreats from the Sun, its resplendent tail and glowing coma begin to wane, disappearing completely as the comet nears aphelion, the farthest point away from the Sun in its long, elliptical journey.

1-It can be inferred from the passage that the orbit of a comet would most closely resemble the shape of

- A- a pear
- B- a ball
- C- a box
- D- an egg

2- The word "trek" in paragraph 1 is closest in meaning to

- A- work
- B- trip
- C- development
- D- demise

3- It can be inferred from the passage that comet Enke appears more frequently than Halley's comet because

- A- it travels at a higher velocity
- B- its magnitude is less than that of Halley's
- C- it is lighter in weight than Halley's

- D- the length of its orbit is less than that of Halley's
- 4- Which of the following is NOT listed as a component part of a comet?
- A- The nucleus
 - B- The coma
 - C- The silicate
 - D- The tail
- 5- The word "dubbed" in paragraph 2 could best be replaced by which of the following?
- A- Called
 - B- Copied
 - C- Insulted
 - D- Soiled
- 6- The passage states that the coma is
- A- inside the nucleus
 - B- around the nucleus
 - C- ten thousand miles from the nucleus
 - D- mixed with the gases that compose the nucleus
- 7- According to the passage, the tail of a comet is longest when it is
- A- closest to the Sun
 - B- closest to the Earth
 - C- farthest from the Sun
 - D- retreating from the Sun
- 8- The word "wane" in paragraph 3 is closest in meaning to
- A- diminish
 - B- vary
 - C- shine

D- evaporate

9- Which of the following would probably NOT be included in a summary of the passage?

A- The orbit of a comet

B- The discovery of new comets

C- The components of a comet

D- The tail of a comet

10- Where in the passage is the tail of the comet compared to something human?

A- The third sentence in paragraph 1

B- The first sentence in paragraph 2

C- The third sentence in paragraph 3

D- The fifth sentence in paragraph 3

Passage 4:

Calamity Jane, the heroine of the Old West, came from a very ordinary background. In 1852, she was born to a couple living on a backwoods farm in Missouri. Thirteen years later, her parents, Robert and Charlotte Cannary, decided to abandon their non-producing farm and headed with their six children to Independence, where they joined a wagon train and took the famous Oregon Trail west. Five months after the start of the trip, they veered off the trail and settled in a mining camp in Montana. Not long after their arrival, Charlotte and Robert succumbed to illness one after the other, leaving their children to fend for themselves. These humble lives would have been forgotten had it not been for the eldest daughter, Martha, who later achieved celebrity as Calamity Jane.

Martha Jane Canary was a real woman with a very interesting life. At the age of 16, forced to make her own way in the world, she first took on what was considered women's work, such as cooking and washing laundry. Later, she dressed in men's clothing and took on work not open to women: she laid track for the nation's first transcontinental railroad and worked as a bullwhacker, a driver of bull teams. She also acquired the habit of cursing ferociously and drinking raw, frontier whiskey. It was around this time that people started calling her Calamity Jane, and, as her fame grew, she began appearing in Wild West shows in the East. After a stint in the shows, she headed back west to Deadwood, where she put pen to paper and captured her life story in a book. The story that she produced, however, was more fiction than fact. It was by writing down the inflated version of her life story that this frontier woman named Martha Jane, who dressed, drank, and swore like a man, created a true heroine of the Old West.

Calamity Jane certainly was a heroine of the Old West, at least in the stories she told. Her skill at telling amazing and exciting stories about her many adventures inspired others to write about them in newspapers. As these tall tales grew into legends, Calamity was depicted as a sharpshooter, a competitor with Buffalo Bill, a scout for General Custer, and a death-defying daredevil. It seems that Martha Jane Canary is known today, not for the unusual life she actually led, but for the tall tales that she created about a larger-than-life character named Calamity Jane.

1- Which of the following would be the best title for this passage?

A- Calamity Jane and the Wild West Show

B- Calamity Jane: The Woman and the Legend

C- The Early Years of Calamity Jane

D- Calamity Jane in Deadwood

2- The word "veered" in paragraph 1 could best be replaced by which of the following?

A- Stopped

B- Drove

C- Got lost

D- Turned

3- The expression "fend for" in paragraph 1 is closest in meaning to

A- fight about

B- think about

C- take care of

D- look for

4- It can be inferred from the passage that Calamity Jane first started wearing men's clothes

A- to be more comfortable

B- to gain new employment options

C- to work in a laundry

D- to appear in Wild West shows

5- A "bullwhacker" in paragraph 2 most likely

A- steers teams of bulls ~hauling wagons

B- works tending bulls

C- drives bulls onto railroad cars

D- works on a team of bull riders

6- What is stated in the passage about Calamity Jane's book?

A- It was an entirely fictionalized account of her life.

- B- Its facts were uncontested.
 - C- The facts of her life were understated.
 - D- It was not entirely true.
- 7- Which of the following activities does the passage suggest that Calamity Jane might NOT have taken part in?
- A- Competing with Buffalo Bill
 - B- Laying track for the transcontinental railroad
 - C- Appearing in Wild West shows
 - D- Working as a bullwhacker
- 8- Where in the passage does the author explain how Calamity Jane's parents died?
- A- The fifth sentence of paragraph 1
 - B- The third sentence of paragraph 2
 - C- The sixth sentence of paragraph 2
 - D- The fourth sentence of paragraph 3
- 9- The purpose of this passage is to
- A- cite the causes of a historical event
 - B- argue against a thesis
 - C- demystify a legend
 - D- compare and contrast two historical figures

Passage 5:

Polymorphs are minerals with a common composition but distinct internal structures. Polymorphs exist because of the widely varying physical conditions under which minerals are formed. Minerals can be formed in the fierce heat well below the Earth's surface or in cold, damp domains much closer to the surface. Most of the elements that make up minerals are widely distributed throughout the planet's crust. Compounds with like chemical compositions can be created in different physical

settings, resulting in compounds with two or more strongly differentiated internal structures, each of which is stable in a different physical setting. These related minerals with unlike crystal structures are known as polymorphs, which means "several forms."

A commonly cited illustration is carbon, which has four known polymorphs. Two of the polymorphs of carbon, chaoite and lonsdaleite, are quite rare and have only been found in meteorites. The most widespread of carbon's four polymorphs is graphite, which forms loosely bonded crystals at relatively low temperatures and pressures. Much of the Earth's crust is conducive to the formation of graphite, making graphite the most pervasive of carbon's polymorphs. Diamond is another polymorph of carbon, one that requires the high temperatures and pressures deep within the Earth's crust to form. Diamond forms at depths lower than 150 kilometers below the Earth's surface, at temperatures higher than 1,000 degrees centigrade, and at pressures greater than 50,000 times the pressure on the surface of the Earth. Diamond is brought closer to the surface of the Earth when gas-rich magmas from deep in the Earth's mantle erupt through cracks known as diatremes, or diamond pipes. Because of its formation so deep in the Earth, diamond forms extremely hard crystals and is the most compact and strongly bonded of the four polymorphs of carbon.

1-How is the information in the passage organized?

- A- Two contrasting ideas are presented.
- B- A concept is followed by an example.
- C- A reason is cited for a specific result.
- D- One component of a generalization is detailed.

- 2- What is implied in the passage about the polymorphs of carbon?
- A- They do not have the same composition.
 - B- They have similar internal structures.
 - C- They require differing temperatures to form.
 - D- They are formed at similar depths below the Earth's surface.
- 3- The word "fierce" in paragraph 1 could best be replaced by
- A- Intense
 - B- Angry
 - C- Unstable
 - D- mean
- 4- The word "like" in paragraph 1 could best be replaced by
- A- desirable
 - B- possible
 - C- approximate
 - D- similar
- 5- Which of the following is NOT a polymorph of carbon?
- A- Carbonite
 - B- Chaoite
 - C- Graphite
 - D- Diamond
- 6- The word "widespread" in paragraph 2 is closest in meaning to
- A- Spacious
 - B- Temperate
 - C- Remarkable
 - D- Common
- 7- The pronoun "one" in paragraph 2 refers to
- A- Diamond

- B- Polymorph
- C- Carbon
- D- crust

8- The passage states that diamond forms

- A- at depths 150 meters below the surface of the Earth
- B- at temperatures that exceed 1,000 degrees centigrade
- C- at pressures up to 50,000 times the pressure on the Earth's surface
- D- during the eruption of gas-rich magmas from the Earth's mantle

9- A diatreme has most likely been nicknamed a diamond pipe because

- A- the cracks in the Earth's mantle are smoking
- B- a diatreme is partly made of diamond
- C- a diatreme serves as a conduit for diamonds
- D- diamonds are heated in the gas-rich magmas

10- It can be inferred from the passage that diamond

- A- cannot be formed close to the Earth's surface
- B- is not as strongly bonded as graphite
- C- is formed from gas-rich magmas
- D- has a less compact structure than lonsdaleite

Passage 6:

In 1796, George Washington, the first president of the United States, resigned after completing two four-year terms in office. He had remained in the service of his country until he was assured that it could continue and succeed without his leadership. John Adams took over Washington's position as president in a smooth and bloodless change of power that was unusual for its time.

By the end of Washington's presidency, the American government had been established. The three branches of government had been set up and were in working order. The debt had been assumed, and funds had been collected; treaties with major European powers had been signed, and challenges to the new government authorities had been firmly met. However, when Washington left office, there were still some unresolved problems. Internationally, France was in turmoil and on the brink of war; domestically, the contest for political control was a major concern. In addition, there was still some resistance to governmental policies.

It was within this context that Washington made his farewell address to the nation. In the address published in a Philadelphia newspaper, Washington advised his fellow politicians to base their views and decisions on the bedrock of enduring principles. He further recommended a firm adherence to the Constitution because he felt that this was necessary for the survival of the young country. He asked that credit be used sparingly and expressed concerns about the unity, the independence, and the future of the young country. In regard to relations with foreign powers, he encouraged the country not to be divided by the conflicts in Europe. Stating that foreign influences were the foe of the republican government, he maintained that relations were to be strictly commercial and not political. He pleaded with the American public to guard their freedoms jealously. Finally, he reminded all citizens of the need for religion and morality and stated his belief that one cannot have one without the other.

1- The paragraph preceding the passage most probably discussed

- A-the Revolutionary War
- B-George Washington's presidency

- C-European wars
- D-the writing of the Constitution

2- Which of the following would be the best title for this passage

- A-The First President of the United States
- B-John Adams Takes Over the Presidency
- C-Challenges Facing the New U.S. Government
- D-George Washington's Farewell to Office

3- The pronoun "it" in paragraph 1 refers to

- A-Office
- B-service
- C-country
- D-leadership

4- It can be inferred from the passage that John Adams

- A-was the second president of the United States
- B-had a new idea
- C-also served as president for eight years
- D-was a part of a bloody change of power

5- The word "bloodless" in paragraph 1 could best be replaced by

- A-unhealthy
- B-deathly
- C-inorganic
- D-nonviolent

6- The word "working" in paragraph 2 is closest in meaning to which of the following?

- A-Laboring
- B-Functioning

C-Toiling
D-Producing

7- According to the passage, what had occurred by the end of George Washington's presidency?

A-The debt had been paid off.
B-A three-branch government was being considered.
C-Treaties were in place with European governments.
D-The government had begun distributing funds.

8-The word "domestically" in paragraph 2 is closest in meaning to the expression

A-within the individual
B-within the home
C-within the country
D-within the world

9-The word "survival" in paragraph 3 is closest in meaning to

A-continued life
B-renewed birth
C-successful transition
D-systematic growth

10 -Where in the passage does the author mention Washington's belief about a U.S. document?

A-The second sentence in paragraph 1
B-The fourth sentence in paragraph 2
C-The third sentence in paragraph 3
D-The sixth sentence in paragraph 3

Passage 7:

Further to the west, the Grand Canyon is one of the world's most spectacular natural phenomena. It is located in the northern part of the state of Arizona, in the United States of America. Covering one and one quarter million acres, it stretches 277 miles east to west and extends 1 to 18 miles in width. The depth has been measured at one mile, which is deeper than any other canyon in the world. It is easy to see why the Grand Canyon is included as one of the Seven Wonders of the World.

Tourist travel to the canyon began as early as 1890 and increased rapidly after a hotel was built on the South Rim seven years later. In 1919, the Grand Canyon Park was established, with its headquarters on the South Rim of the canyon. Ninety percent of the visitors view the Grand Canyon from the South Rim, which, unlike the North Rim, is open year round. Visitors can drive around the canyon to the North Rim by using a road that is 214 miles long. They can also cross the canyon over a 21-mile trail on a two-day hike. Most visitors drive along the park roads, stopping at scenic viewing points and many take walks along the canyon rim or hike along one of the 38 trails. Campers can ride mules down into the canyon, and water enthusiasts rent boats or canoes to use on the Colorado River.

The habitat for wildlife at the Grand Canyon is spectacular. The white-tailed Kaibab squirrel and pink Grand Canyon snake are indigenous and exclusive to this area. Some other animals of interest that roam the canyon are elk, deer, mountain lions, and bighorn and pronghorn sheep, while the Colorado River is home to a beaver population. Bird lovers can scan the skies for approximately 300 species of birds. The Grand

Canyon is a diverse region of vast proportions with infinite scenes of wild beauty.

1-The paragraph preceding the passage most probably discussed

- A- the natural beauty of the Grand Canyon
- B- a natural wonder to the east of the Grand Canyon
- C- a hotel built on the South Rim of the Grand Canyon
- D- a trip to the west of the Grand Canyon

2- "Acres" in paragraph 1 are most likely a measurement of

- A- height
- B- weight
- C- area
- D- volume

3- It can be inferred from the passage that one reason for light tourism to the Grand Canyon prior to 1890 was that

- A- there was ~a lack of accommodations
- B- the South Rim had not been discovered
- C- the road to the North Rim had not been opened
- D- tourists had no interest in natural wonders

4- The word "headquarters" in paragraph 2 is closest in meaning to

- A- guest rooms
- B- visitor center
- C- research facility
- D- main office

5- According to the passage, where do most people go to see the Grand Canyon?

- A- The South Rim
- B- The Grand Canyon Village

- C- The North Rim
- D- The Colorado River

6- "Water enthusiasts" in paragraph 2 are most likely

- A- people who drink a lot of water
- B- people who work in water
- C- people who enjoy water sports
- D- people who enjoy rainy weather

7- The expression "home to" in paragraph 3 could best be replaced by

- A- the house of
- B- the habitat of
- C- the municipality of
- D- the lodging of

8- The main idea of the third paragraph is that the Grand Canyon

- A- is home to a marvelous variety of wildlife
- B- provides spectacular views of geographical formations
- C- has a huge number and variety of birds
- D- is attractive to tourists for various reasons

9- Where in the passage does the author mention two animals that live only in the Grand Canyon area?

- A- The first sentence in paragraph 1
- B- The second sentence in paragraph 2
- C- The seventh sentence in paragraph 2
- D- The second sentence in paragraph 3

Passage 8:

A hoax of some note was apparently perpetrated on {Appleton's Cyclopedia of American Biography} an important

American biographical dictionary that was published in 1889. This extensive and well-regarded reference was published with a number of biographies of scientists who most likely never existed or who never actually undertook the research cited in the biographical dictionary.

It was not until some 30 years after {Appleton's Cyclopedia} was first published that word of the fake biographies began cropping up. It was noted in a 1919 article in the {Journal of the New York Botanical Garden} that at least 14 of the biographies of botanists were fake. Then, in 1937, an article in the {American Historical Review} declared that at least 18 more biographies were false.

The source of the false biographies is not known to this day, but a look at a number of steps in the process by which articles were submitted to the biographical encyclopedia sheds some light on how such a hoax could have occurred. First, contributors were paid by the number and length of articles submitted, and the contributors themselves, as experts in their respective fields, were invited to suggest new names for inclusion. Then the false biographies were created in such a way as to make verification of facts by the publisher extremely difficult in an era without the instantaneous communication of today: the false biographies were all about people who supposedly had degrees from foreign institutions and who had published their research findings in non-English language publications outside of the United States. Finally, the reference itself provides a long list of contributors but does not list which articles each of the contributors submitted, and, because the hoax was not discovered until well after the reference was first published, the publishing

company no longer had records of who had submitted the false information.

Unfortunately, the false information about historical research did not disappear with the final publication of the book. Though it is now out of print, many libraries have copies of this comprehensive and, for the most part, highly useful reference. Even more significant is the fact that a number of false citations from {Appleton's Cyclopedia} have cropped up in other reference sources and have now become part of the established chronicle of scientific and historical research.

1-The main idea of the passage is that {Appleton's Cyclopedia of American Biography}

- A- contains some false information that was submitted intentionally
- B- today is a significant compilation of biographies
- C- has omitted all false information from its pages
- D- contains biographies from numerous contributors

2- The word "note" in paragraph 1 could best be replaced by

- A- letter
- B- warning
- C- importance
- D- message

3- Which of the following is NOT mentioned about {Appleton's Cyclopedia of American Biography} ?

- A- It was prepared for publication in the nineteenth century.
- B- It was quite a lengthy reference.
- C- It was ~well thought of when published.

D- It later became known as the {American Historical Review}.

4- The expression "sheds some light on" in paragraph 3 could best be replaced by

A- turns on

B- gets rid of

C- expresses regrets about

D- helps to explain

5- What is stated in the passage about the contributors?

A- They are not listed in the reference.

B- They are listed with each article submitted.

C- They preferred to write shorter articles.

D- They suggested new names to appear in the reference .

6- The information in the biographies was difficult to verify for all the following reasons EXCEPT that the biographies were

A- from an era with slow communication

B- about people who had studied outside the United States

C- about people who had published research outside of the United States

D- about people who had published in English language publications

7- The word "well" in paragraph 3 could best be replaced by which of the following ?

A- Healthy

B- Long

C- Successful

D- Fit

8- What is the importance today of this century-old hoax?

- A- The false information has spread to other sources.
 - B- The reference is now out of print.
 - C- The reference provides a long list of contributors.
 - D- The false citations have been removed from the reference.
- 9- Which paragraph describes the discovery of the hoax?
- A- The first paragraph
 - B- The second paragraph
 - C- The third paragraph
 - D- The last paragraph
- 10- Which of the following best describes the ~tone ~of the passage?
- A- Joking
 - B- Congratulatory
 - C- Informative
 - D- Insulting

Passage 9:

The Golden Gate Bridge was only a far-fetched idea before the 1900s. The name Golden Gate, which refers to the channel between the two peninsulas where the city of San Francisco and Marin County face each other, is a narrow and turbulent body of water at the entrance to San Francisco Bay. In the early 1800s, when what is now San Francisco was the small village of Yerba Buena, tank boats provided passage across this narrow strait to the wealthy few who could afford this mode of transportation. As tiny Yerba Buena grew into the bustling city of San Francisco, there was a need for improved transportation

across the channel. By 1868, there was regular ferry service for workers who lived in Marin County, and the notion of a bridge to span the channel was being circulated.

Spanning the gap between the idea and a feasible plan took time and determination. In 1916, the {San Francisco Bulletin} proclaimed that it was time to "bridge the Gate," and a feasibility study of the idea was undertaken by the government. Joseph Strauss, a well-known builder of bridges, took up the challenge after World War I and submitted his plan in 1921. The War Department granted the land for the project, Strauss was elected head engineer, and then Strauss's plan was approved by the War Department after the War Department was convinced that there would be a large enough differential between the water level and the bridge for tall ships to be able to get through.

The strategy for financing the bridge was to sell bonds to raise the whopping \$35 million needed for the project and then repay the bonds with tolls from the bridge. A major hurdle to cross was to get the voters behind the financial plan. To win the voters' support, the district promised to hire only local workers with at least one year of residency, a suggestion that was extremely popular during the era of the Great Depression. The plan passed with a whopping majority; with the financial issue resolved, official construction of the Golden Gate Bridge began on January 5, 1933.

Completion of the bridge was celebrated with a parade and groundbreaking ceremonies. At these ceremonies, a telegram of congratulations from President Hoover was read to the exuberant crowd, and the University of California at Berkeley unveiled an 80-foot model of the bridge constructed by its

engineering students. To spread the wonderful news to the whole state, 250 pigeons were let loose to carry the message of the birth of the Golden Gate Bridge.

1-The purpose of the passage is to discuss

- A- the development of San Francisco into a bustling city
- B- the building of the Golden Gate Bridge
- C- the danger of the Golden Gate channel
- D- the men behind the building of the bridge

2- According to the passage, the name Golden Gate refers to

- A- the color of the bridge
- B- the entrance to the city of San Francisco
- C- the ferry service to Marin County
- D- the body of water between the two peninsulas

3- The word "mode" in paragraph 1 could best be replaced by which of the following?

- A- Fashion
- B- Average
- C- Method
- D- Model

4- The word "circulated" in paragraph 1 is closest in meaning to

- A- passed around
- B- put down
- C- thrown out
- D- brushed off

5- The word "head" in paragraph 2 could best be replaced by

- A- chief

B- brain

C- face

D- peak

6- The passage implies that the War Department was worried about

A- the cost of the bridge

B- the amount of time needed to build the bridge

C- the height of the bridge above the water

D- the legalities of building the bridge

7- The word "tolls" in paragraph 3 is closest in meaning to

A- tours

B- gifts

C- products

D- fares

8- What suggestion was extremely popular, according to the passage ?

A- Requiring voters to pay for the bridge through tolls

B- Not allowing outside laborers to work on the bridge

C- Requiring voters to be residents

D- Encouraging local residents to support the plan

9- How was the completion of the bridge celebrated ?

A- President Hoover made a speech.

B- A model of the bridge was constructed.

C- The University of California at Berkeley offered an engineering scholarship.

D- Some birds were freed.

10- Where in the passage does the author describe a difficulty with the financial plan?

- A- The fifth sentence in paragraph 1
- B- The second sentence in paragraph 2
- C- The second sentence in paragraph 3
- D- The third sentence in paragraph 4

Passage 10:

Photosynthesis is the process by which green plants use the sun's light energy to convert basic metabolites`water, carbon dioxide, and trace minerals into simple sugars. The process of photosynthesis occurs in the mesophyll cells of green leaves, inside tiny, disk-shaped organelles called chloroplasts, which are filled with light-reactive pigments. The primary photosynthesizing pigment is chlorophyll; however, yellow and orange caretenoids also play a significant role in photosynthesis.

Light itself is the primary limiting factor of photosynthesis: too much light decreases photosynthetic activity and insufficient light fails to activate the reaction centers of the chlorophyll. Chloroplasts respond to the specific light needs of the plant by moving about within the cytoplasm, or fluid of the leaf cells, to reposition themselves at an optimal angle to the sun. When the sun is intense, they turn up on their edges, thus minimizing the direct impact of solar radiation. On overcast days, when there is not so much direct sunlight, chloroplasts rise to the top of the mesophyll cells and face the rays at 90-degree angles to gather as much light as possible. In lower-shade leaves, chloroplasts tend to be more spherical and evenly spaced throughout the cells in order to maximize absorption of diffused rays.

Though chlorophylls are efficient light-gathering pigments, caretenoids assist chlorophylls in photosynthesis. Caretenoid molecules boost photosynthesis energy levels by passing on their gathered photon energy to neighboring chorophyll reaction centers. More significantly, however, caretenoids help protect chlorophyll from irreparable solar damage. On bright days

when the leaf is "pumped" full of light and heat energy, the caretenoids act as sponges, absorbing excess energy from the chlorophyll and dissipating it harmlessly, thus preventing the delicate chlorophyll from being scorched.

1- What is stated in the passage about photosynthesis?

- A-Simple sugars are created during photosynthesis.
- B-Photosynthesis takes place outside of chloroplasts.
- C-Chlorophyll is the only photosynthesizing pigment.
- D-The role of caretenoids in photosynthesis is unimportant.

2- According to the passage, which of the following is NOT an example of a metabolite?

- A-Water
- B-Minerals
- C-Air
- D-Sunlight

3-The word "convert" in paragraph 1 is closest in meaning to

- A-receive
- B-exchange
- C-turn
- D-lose

4- The passage mentions chloroplasts performing all of the following functions EXCEPT

- A-swimming within the cytoplasmic fluid
- B-changing their orientation to the sun
- C-changing their shape
- D-transferring excess energy to the caretenoids

5- The word "cytoplasm" in paragraph 2 is closest in meaning to

- A-tiny, disk-shaped organelles
- B-fluid in the cells of the leaf
- C-turned-up edges of the leaf
- D-lower-shade leaves of a plant

6- The pronoun "they" in paragraph 2 refers to

- A-centers
- B-chloroplasts
- C-needs
- D-cells

7- The word "overcast" in paragraph 2 is closest in meaning to which of the following?

- A-Cold
- B-Summer
- C-Cloudy
- D-Short

8- Which of the following is NOT mentioned in the passage as a function of caretenoids?

- A-Passing on light energy
- B-Protection of chlorophyll
- C-Absorption of light
- D-Repositioning themselves within the cytoplasm

9- The pronoun "it" in paragraph 3 refers to

- A-leaf
- B-light
- C-energy
- D-chlorophyll

10- This passage would most likely be assigned reading in which of the following courses?

- A-Physiology
- B-Botany
- C-Meteorology
- D-Photography

Passage 11:

Theodore Seuss Geisel became a writer of children's books quite by accident. After college in the United States, he did his graduate work in England and France, with the intention of becoming a professor of English. After graduation, instead of pursuing his intended goal, he was hired by the Standard Oil Company as its advertising artist. It was on a trip across the Atlantic from Europe in 1936 that his writing career was born; on that trip, he wrote a nonsense poem to the beat of the ship's engine. This poem, "And to Think That I Saw It on Mulberry Street," was published as a book in 1937.

It took 20 years for Theodore Geisel to achieve fame as an author. It was the publication of {The Cat in the Hat} in 1957 that made him a household name. Using the pseudonym Dr. Seuss, Geisel founded the publishing company Beginner Books and began churning out hit after hit.

A number of factors contributed to the success of the Dr. Seuss books. Some of the most frequently mentioned reasons are that his children's books have a catchy rhythm pattern and rhyme scheme that differentiate them from all others and make them easy to read and impossible to forget. Furthermore, his tales are of a preposterous nature, with unusual characters and objects that provide a sense of wonder to children and adults alike. Finally, these tales are accompanied by whimsical drawings that are as enjoyable to look at as the stories are fun to read.

Theodore Seuss Geisel authored more than 50 books in the years from 1937 to 1990, and one of the books, {How the Grinch Stole Christmas}, was even turned into a holiday cartoon for television. His last book, called {Oh, the Places You'll Go},

was published in 1990, one year before his death. This beloved writer will remain a favorite author of children for generations to come.

1- It is stated in the passage that Theodore Geisel

- A- planned to be an English professor
- B- intended to live permanently in Europe
- C- wrote hundreds of books
- D- had a friend who owned a publishing company

2- The possessive "its" in paragraph 1 refers to

- A- a professor of English
- B- his intended goal
- C- the Standard Oil Company
- D- a trip across the Atlantic

3- According to the passage, Theodore Seuss Geisel wrote the poem "And to Think That I Saw It on Mulberry Street"

- A- in college
- B- while living in England
- C- on an ocean voyage
- D- on Mulberry Street

4- The word "nonsense" in paragraph 1 is closest in meaning to which of the following?

- A- Insensitive
- B- Paradoxical
- C- Inspirational
- D- Senseless

5- The word "beat" in paragraph 1 could best be replaced by

- A- rhythm

B- pressure

C- win

D- power

6- A "pseudonym" in paragraph 2 is most likely

A- a publishing company

B- a fictitious name

C- a book title

D- a kind of profession

7-The expression "churning out" in paragraph 2 could best be replaced by

A- reading

B- naming

C- producing

D- solving

8-Where in the passage does the author mention the illustrations that Dr. Seuss included with his stories?

A- The fourth sentence in paragraph 1

B- The second sentence in paragraph 2

C- The fourth sentence in paragraph 3

D- The second sentence in paragraph 4

9-It can be determined from the passage that Theodore Geisel died

A- in 1957

B- in 1989

C- in 1990

D- in 1991

10-Which paragraph explains the reasons for the success of the Dr. Seuss books

A- The first paragraph

B- The second paragraph

C- The third paragraph

D- The last paragraph

-
Passage 12:

The Camerata, a club that opened up a new world of music, was founded sometime before 1580 in Florence, Italy. The men and women in this group were musicians, singers, composers, and poets. They met at the home of Count Bardi, the local patron of artists. Among the club's distinguished members were the renowned singer and voice teacher Caccini and Vincenzo Galilei, an amateur musician and the father of Galileo, the famous astronomer.

Opera was conceived in the minds and hearts of these visionaries, motivated by a desire to improve the quality of music for the stage. Searching for direction, they looked to the authority of the ancient Greek dramas and set about trying to revive them. Since the actual Greek music was unknown, the club engaged in arduous study of the writings of the great philosophers. Careful speculation and long, animated discussions revealed the secret of Greek stage music: the perfect union of words and music, achieved by making the words dominant. Based on this profound insight, they established three principles: the text must be clearly understood, the words must be sung, and the music must interpret the feeling of the entire passage.

Those simple statements provided the members of the Camerata with guidelines which served as the foundation for the creation of a new musical form. In 1594, Jacopi Peri composed the music for Rinuccini's libretto, {Dafne}, which was the first opera ever written. Three years later, in 1597, it was sung by Caccini and his daughter Francesca at a private performance in Florence. With this event, opera was born and her proud parents foresaw a wonderful future.

The Camerata has been compared to Columbus, who set sail to find the riches of the West Indies and instead discovered the

treasured lands of the New World. In the process of attempting to revive ancient Greek theater and its music, the Camerata created a new form of musical theater. As the centuries passed, opera grew and developed, endearing itself to millions even to this day.

11-Which of the following would be the best title for this passage?

- A- An Overview of Florence, Italy
- B- The Camerata Gives Birth to Opera
- C- Columbus and the Camerata
- D- The Modern-Day Opera

12-According to the passage, Vincenzo Galilei was

- A- also known as Count Bardi
- B- a professional musician
- C- a famous astronomer
- D- a participant in the Camerata

13-The word "renowned" in paragraph 1 is closest in meaning to

- A- famous
- B- gifted
- C- solitary
- D- educated

14-The pronoun "they" in paragraph 2 refers to

- A- minds
- B- hearts
- C- visionaries
- D- dramas

15-Which of the following principles that guided the writers and composers of the first opera was NOT mentioned in the passage?

- A- An understandable text
- B- Staging and costumes
- C- Words sung to music

D- Music that expresses feelings

16-The word "foresaw" in paragraph 3 is closest in meaning to

A- appreciated

B- attended

C- viewed

D- anticipated

17-In the passage, the West Indies and the New World are apparently compared to which of the following?

A- Greek theater and opera

B- Riches and treasured lands

C- Musical form and opera

D- Columbus and the Camerata

18-The word "form" in paragraph 4 could best be replaced by

A- appearance

B- formality

C- type

D- figure

19-Where in the passage does the author indicate what the club learned from studying the Greek philosophers?

A- The fourth sentence in paragraph 1

B- The second sentence in paragraph 2

C- The fourth sentence in paragraph 2

D- The first sentence in paragraph 3

20-Which paragraph describes the membership of the Camerata?

A- The first paragraph

B- The second paragraph

C- The third paragraph

D- The fourth paragraph

Passage 13:

During the same era when Texas was being annexed by the United States, the Oregon Territory was on the road to statehood, and the settlement of the Oregon Territory played an equally important role in the expansion of the United States. In the late 1700s, in the period after the War of Independence from England, both the United States and England laid claim to the Oregon Territory. Fur traders and missionaries reached the Pacific Northwest and sent back reports of wonderful green and fertile valleys suitable for farming. These reports enticed thousands of settlers to move to the region. Thousands made the trip west, starting in the 1830s. The route that these settlers took became known as the Oregon Trail.

The Oregon Trail began in Independence, Missouri, and went all the way to the Oregon Territory in the Pacific Northwest. The trip along the trail was quite long, particularly considering that many of the settlers accompanied the wagons on foot. It covered more than 2,000 miles and took about six months. The trail was not just on flat land; it traversed the Great Plains region and then crossed over the Rocky Mountains. It was also a rather dangerous trip, but not for the reason that most people assume. Attacks by Native American tribes on travelers moving along the Oregon Trail were not a major problem. Instead, there was much more danger to travelers from communicable diseases such as cholera and smallpox, from natural forces such as flooded rivers on the plains, or from harsh weather in the Rockies.

Because of the huge number of American settlers who poured into the Oregon Territory in the 1830s and 1840s, England

gave up on the idea of adding the Oregon Territory to its empire. In 1846, England gave up control to the United States of all territory in the Pacific Northwest south of the 49th parallel, excluding Vancouver Island, and later turned over the rest of its North American territories to Canada. Today, with the exception of Vancouver Island, the 49th parallel is the boundary between the United States and Canada.

1- The paragraph preceding the passage most probably discussed

- A- the expansion of the United States into Missouri
- B- the road to Texas statehood
- C- the War of Independence from England
- D- the annexation of the Oregon Territory

2- Which of the following best expresses the ~topic ~of this passage?

- A- The expansion of the United States into the Oregon Territory
- B- The difficulty of traveling on the Oregon Trail
- C- England's claim for the Oregon Territory
- D- The life of settlers in the Oregon Territory

3- According to the passage, who claimed the Oregon Territory in the late eighteenth century?

- A- The United States and England
- B- Missouri and Canada
- C- England and Canada
- D- The United States and Missouri

4- The word "enticed" in paragraph 1 is closest in meaning to

- A- Informed
- B- Forbid
- C- Attracted
- D- forced

- 5- The pronoun "it" in paragraph 2 refers to
- A- the Pacific Northwest
 - B- the trip
 - C- settlers
 - D- foot
- 6- The word "communicable" in paragraph 2 could best be replaced by
- A- talkable
 - B- deadly
 - C- understandable
 - D- contagious
- 7- According to the passage, which of the following caused the least trouble for settlers traveling along the Oregon Trail ?
- A- Disease
 - B- Attack
 - C- Flood
 - D- Inclement weather
- 8- The word "poured" in paragraph 3 could best be replaced by
- A- rained heavily
 - B- served graciously
 - C- swarmed steadily
 - D- spread precisely
- 9- Which of the following can be inferred about Vancouver Island from the passage ?
- A- It is north of the 49th parallel.
 - B- It belongs to the United States.
 - C- It is located in Oregon.

D- It is part of Canada today .

10- Where in the passage does the author mention the modes of transportation used by travelers on the Oregon Trail ?

A- The third sentence in paragraph 1

B- The second sentence in paragraph 2

C- The fifth sentence in paragraph 2

D- The first sentence in paragraph 3

Passage 14:

Another type of growth also occurs in trees in the cambium, a layer of cells covering the woody part of the tree. The trunk, branches, and roots become wider and thicker as the cells in the cambium divide. This causes the cambium to grow outward and form visible tree rings, one for each year of growth. This growth in the tree's girth is perhaps not as noticeable as the growth of leaves, the lengthening of the branches, and the increasing height of the tree, but it is equally important. Without the added circumference on the trunk, roots, and branches, a tree could not support any added height.

A look at the tree rings that are added each year to the trunk, roots, and branches of a tree with the growth of the cambium can provide insight into the speed at which the tree has developed. When growth has been slow, perhaps during periods of drought, the tree rings are more narrow. When growth has been rapid, during periods conducive to growth, the tree rings are broader.

Whether or not the rings of a tree are lopsided provides further insight into the development of a tree. Several factors can cause the tree rings to be off center. One such factor concerns exposure of a tree to wind and other natural elements. A tree that grows in an exposed location will have slower growth on the exposed side and faster growth on the side protected from the elements, causing its rings to be lopsided. Another factor that affects the symmetry of the rings in the branches is the size of the branches. Large

branches tend to grow faster on the underside than on the topside in order to support the weight of the branch.

1-The paragraph preceding this passage most probably discussed the growth

- A- in a tree's cambium
- B- of tree trunks
- C- in the cells covering the woody part of the tree
- D- of leaves, longer branches, and height of the tree

2- What kind of tree growth results from growth in the cambium?

- A- The growth of leaves
- B- The lengthening of branches
- C- The increased height of the tree
- D- The thickening of the roots

3- The word "girth" in paragraph 1 is closest in meaning to

- A- weight
- B- value
- C- circumference
- D- height

4- The pronoun "it" in paragraph 1 refers to

- A- growth
- B- girth
- C- lengthening
- D- height

5- It can be inferred from the passage that

- A- one tree may have some wide and some narrow rings
- B- trees with wide rings are very rare

- C- in some years trees have no ring growth
- D- no tree would have both wide and narrow rings

6-The word "lopsided" in paragraph 3 is closest in meaning to

- A- aged
- B- broad
- C- proportional
- D- asymmetric

7- The expression "conducive to" in paragraph 2 could best be replaced by which of the following?

- A- Abhorrent to
- B- Supportive of
- C- Rejected by
- D- Prior to

8- What factor might cause the rings of a tree to be lopsided?

- A- A period of drought
- B- Constant ocean winds
- C- A protected location
- D- Long, thin leaves

9- Which of the following is least likely to be a natural element of the sort intended by the author?

- A- Wind
- B- Hail
- C- Oxygen
- D- Water

10 - This passage would most likely be assigned reading in a course in

- A- Physiology
- B- medicine

C- geology

D- botany

Passage 15:

The hummingbird possesses the highest aerobic metabolism in the animal kingdom. This tiny bird feeds itself by hovering, in helicopter fashion, in front of a flower while sipping nectar, beating its wings at the incredible rate of 60 to 75 times per second, so fast that the wings appear as a blur to the naked eye. Hover-flight uses so much energy that a hummingbird must daily consume approximately 180 meals or three times its own body weight in nectar just to survive. Ironically, the hummingbird spends nearly 75 percent of its waking hours sitting idly on a perch. Thus, the wake-cycle of the hummingbird is characterized by long periods of inactivity punctuated by short bursts of intense foraging.

The heart of the hummingbird is the engine that drives its high-powered metabolism. In general, the hearts of birds are not only larger but also more powerful than those of mammals or reptiles of comparable size. There is an inverse relationship between overall body size and heart size, with smaller birds having proportionately larger hearts. For example, an ostrich weighing 123 kilos has a heart that accounts for only 1 percent of its body mass. By contrast, an average hummingbird with a body weight of merely 4.8 grams has an "enormous" heart at 1.14 grams, accounting for nearly 25 percent of its total body mass.

Whereas the relative size of a heart determines the power of the engine, the heart rate (i.e., heartbeats per minute) is a measurement of how fast the engine is running. In birds, the heart rate is higher than it is in mammals of comparable size. Also,

smaller birds have higher heart rates than do larger ones. The resting heart rate of the common pigeon is 221, whereas that of the ruby-throated hummingbird is 614. By comparison, the average human heart beats 72 times per minute.

As evening falls, the hummingbird faces a drastic metabolic crisis 'surviving the chilly night hours without refueling itself. Nevertheless, it is able to stretch its limited reserves by suppressing its metabolism, which in turn causes the bird's body temperature to drop to within a few degrees of the ambient temperature. The basal temperature of Anna's hummingbird, for instance, can plummet from a 38-degree Celsius daytime reading to a frigid 14 degrees Celsius at night. Hummingbirds can even revert to a torpor, a dormant state with rigidity and closed eyes. Torpidity is characteristic of reptiles but is extremely rare among birds.

1- The word "fashion" in paragraph 1 could best be replaced by

- A- Manner
- B- Design
- C- Shape
- D- speed

2- According to the passage, the hummingbird spends most of its waking hours

- A- hovering
- B- resting
- C- foraging
- D- preening

3- In the second paragraph, the author most likely mentions the ostrich in order to

- A- show that an ostrich is heavier than a hummingbird
 - B- show that an ostrich's heart is much larger than a hummingbird's heart
 - C- illustrate the relatively small size of an ostrich's heart
 - D- contrast a flightless bird to the hummingbird
- 4- The word "running" in paragraph 3 could best be replaced by which of the following ?
- A- Jogging
 - B- Exercising
 - C- Functioning
 - D- Rotating
- 5- Which of the following is NOT mentioned in the passage about hummingbirds?
- A- Their foraging habits
 - B- Their sleep habits
 - C- Their flight characteristics
 - D- Their migration patterns
- 6- The word "plummet" in paragraph 4 is closest in meaning to
- A- Fall
 - B- Stabilize
 - C- Disappear
 - D- Soar
- 7- The word "torpor" in paragraph 4 is closest in meaning to
- A- Activity
 - B- Dormancy
 - C- Docility
 - D- Tranquility
- 8- The word "revert" in paragraph 4 is closest in meaning to

- A- turn on
- B- look again
- C- look up
- D- turn back

9- Where in the passage does the author explain how the hummingbird copes with the nighttime extremes?

- A- The last sentence in paragraph 1
- B- The third sentence in paragraph 2
- C- The fourth sentence in paragraph 3
- D- The second sentence in paragraph 4

10- The paragraph following the passage most probably discusses

- A- the distribution of reptile populations
- B- other species of birds that exhibit torpidity
- C- climate variations in alpine regions
- D- reptile predation on hummingbird specie

Part Four

Grammar Exercises

UNIT ONE

- **Rewrite the following sentences using the word/s in brackets to give the same meaning:**

1. The house hasn't got a garden. (doesn't)
.....
2. How much money have you got? (do)
.....
3. Does Ali have a car? (got)
.....
4. He doesn't own a house in Alexandria. (got)
.....
5. Do you possess a green dress? (got)
.....
6. His telephone number is not in my notebook.
(don't)
.....
7. Serious illness affected him greatly. (effect)
.....
8. I promised him not to speak about the secret. (word)
.....
9. I ate then I went to the cinema. (meal)
.....

10. If you don't read a lot, you won't gain knowledge.

(without)

.....

11. She is not compelled to answer that question.

(doesn't)

.....

12. Will you let me come with you tomorrow? (allow)

.....

13. Do you watch television for a long time? (spend)

.....

14. Young people should care for their old parents.

(The)

.....

15. He returned to his house very tired. (home)

.....

16. He goes to sleep early in order to get up early.

(bed)

.....

17. He was imprisoned for murder. (prison)

.....

18. He stayed at work during lunch hours. (office)

.....

19. We must give a hand to people who are sick. (the)
.....
20. We discussed the plan for our future. (discussion)
.....
21. He loved to trick his young brother. (play)
.....
22. His technique of photography is wonderful. (advise)
.....
23. While I was studying, Nourseen came. (during)
.....
24. He trod on her shoe, and then he apologized to her.
(as soon as)
.....
25. I'd finished my work before I went home. (after)
.....
26. After he had heard the news, he phoned his friend.
(before)
.....
27. The policeman came but the murderer escaped.
(By the time)
.....

28. He revised the lesson then he answered the question. (after)
.....
29. The play began then he arrived at the theatre. (already)
.....
30. He finished his homework, then he watched television. (as soon as)
.....
31. The children slept then their father arrived home. (By the time)
.....
32. He was very tired. He played football for a long time. (because)
.....
33. I drank a lot of water, as I was thirsty. (because)
.....
34. I ate my supper; before that I had a bath. (When)
.....
35. The match was over and then the winners took the cup. (before)
.....

36. He waited for a long time then his friend came.

(until)

.....

37. The firemen arrived but the fire went out.

(By the time)

.....

38. That was the only journey he had made. (never)

.....

39. We must give a hand to those who are poor. (the)

.....

40. Do you possess any jewelry? (have)

.....

41. He drank a lot of coffee during his work. (while)

.....

42. I arrived at the club after he had left. (By the time)

.....

43. The house and the villa are the same price.

(expensive)

.....

44. No man in the city is more courageous than

Hassan. (most)

.....

45. This problem is the most difficult one in the test.

(more)

.....

46. No mountain in the world is higher than Everest.

(highest)

.....

47. Adel is more intelligent than his friends. (less)

.....

48. Cairo is the biggest city in Egypt. (than)

.....

49. I've never met a funny face like Omar's. (ever met)

.....

50. New York is the most intelligent city in the world.

(more)

.....

51. No liquid is cheaper than water. (Water ...)

.....

52. He is younger than his sister. (as)

.....

53. The teacher is not here and the student is not here.

(Neither)

.....

54. The teacher is not here and the students are not here. (Neither)

.....

55. The driver is injured and the passengers are killed. (Not only)

.....

56. Amin has your book or Marawan has your book. (either)

.....

57. He doesn't like coffee; he doesn't like tea. (neither)

.....

58. We were late due to the heavy traffic. (Since)

.....

59. He did not go to school because he was ill. (illness)

.....

60. I could not sleep because of the noise. (As)

.....

61. He failed the test through his carelessness. (careless)

.....

62. I did not go out because it rained. (rain)

.....

63. I got wet because I didn't have my umbrella.
(owing to)

.....

64. I turned on the TV as I wanted to listen to the
news. (so that)

.....

65. I asked the children to be quiet as I wanted to hear
what he was saying. (in order to)

.....

66. I am going to cash a cheque so that I can buy the
car. (in order to)

.....

67. His grades were low but he was admitted to the
university. (Despite)

.....

68. In spite of here hard work, she enjoyed herself.
(her work)

.....

69. He has got a large fortune but he is unhappy.
(however)

.....

70. While Ali is a good student, his brother is lazy.
(Although)
.....

71. In case of illness, he will stay at home. (If)
.....

72. In case of trouble, call the police. (If)
.....

73. You can't travel abroad in case of not having a
passport. (If)
.....

74. Unless I get a rise in my salary, I'll resign.
(In case of)
.....

75. I don't wake up if the alarm clock doesn't ring.
(Unless)
.....

UNIT TWO

- **Choose the appropriate answer from a, b, c, or d:**
1. John Butterfield the Southern Overland Mail Company with two stagecoaches in 1858.
 - a. he set up
 - b. setting up
 - c. set up
 - d. the setup

 2. The radiation piercing the atmosphere of tanning or burning in humans.
 - a. it is the cause
 - b. causing it
 - c. is the cause
 - d. the cause

 3. The during an earthquake are caused by seismic waves.
 - a. actually vibrate
 - b. actual vibrations
 - c. vibrations happen
 - d. from the actual vibrations

 4. During the Middle Ages,, large sets of bells with as many as 70 bells, first became popular.
 - a. with carillons
 - b. carillons are
 - c. carillons have
 - d. carillons

5., an author probably most famous for his tales of terror, also dabbled in some science fiction.
- To Edgar Allen Poe
 - Edgar Allen Poe
 - Edgar Allen Poe was
 - For Edgar Allen Poe to be
6. Humans living at high elevations to the lower level of oxygen in the air by producing more red blood corpuscles.
- Adjust
 - to adjust
 - the adjustment
 - adjusting
7. By 1870, over 30 nations their own postage stamps.
- the issue
 - were issuing
 - issuing
 - they issued
8. The Statue of Liberty, completed in Paris in 1884, in New York Harbor in 1886.
- the unveiling
 - to unveil
 - it unveiled
 - was unveiled
9. Red Ribbon Week, a national campaign to keep young people from using drugs,
- annually in October
 - annually in October each year
 - takes place annually in October
 - taking place annually in October

10. In a triathlon, the, bike, and run.
- athlete swims
 - athletes swim
 - swim athletically
 - the swimming athlete
11. The Mayflower Compact, signed by the Pilgrims upon their arrival in Massachusetts in 1620, their political and religious beliefs.
- the statement of
 - stating
 - with a statement of
 - stated
12. alcoholism are the slow destruction of the liver and possible death.
- Dangerously,
 - The eventual effect of
 - The long-term effects of
 - Chronic and eventual
13. The, the first daily newspaper in the United States, first appeared in 1783.
- two-page {Pennsylvania Evening Post}
 - {Pennsylvania Evening Post} is two pages long
 - {Pennsylvania Evening Post} was
 - two-page {Pennsylvania Evening Post's}
14. On November 19, 1863, Abraham Lincoln, speaking from notes on an old the famous Gettysburg Address in only two minutes time.
- gave the envelope
 - envelope giving
 - envelope, gave
 - gift of an envelope

15. runs parallel to the coast of California for more than 600 miles.
- The San Andreas Fault is long
 - On the San Andreas Fault
 - The San Andreas Fault
 - Along the San Andreas Fault
16., one of the most famous presidents, was assassinated by John Wilkes Booth.
- For Abraham Lincoln
 - Abraham Lincoln was
 - Of all the presidents
 - Abraham Lincoln
17., Jesse Owens won four gold medals at the 1936 Olympics in Berlin.
- Excellent speed and running ability
 - The outstanding track athlete runs
 - An outstanding ~track athlete
 - He had excellent speed and running ability
18. Thomas Jefferson, a personally designed and constructed lap-top desk, wrote the Declaration of Independence in the summer of 1776.
- he used
 - had used
 - the use of
 - using
19. The Great Plains in the Midwest of the United States a rich, fertile farming area.
- definitely making
 - from the beginning
 - the pioneers planted
 - makes up

20. Parent flamingos lose their intense pink coloring until
- a. weaning young
 - b. their youths
 - c. they wean their young
 - d. young
21. Champagne can be purchased by the balthazar, cannot be purchased in this amount.
- a. Brandy
 - b. But
 - c. because brandy
 - d. but brandy
22. has a beautiful red coat, the red panda is called "hun-ho" or "fire fox" in China.
- a. It
 - b. Because it
 - c. On it
 - d. As soon as
23. long enough, every Down's syndrome individual gets Alzheimer's disease.
- a. The person lives
 - b. If the person living
 - c. If the person lives
 - d. Because the life
24. Although Congress passed an income tax law in 1894, in 1895 the law unconstitutional.
- a. the ruling of the Supreme Court
 - b. was ruled by the Supreme Court
 - c. if the Supreme Court ruled
 - d. the Supreme Court ruled

25. When San Diego's summer heat has withered most flowers,
..... bloom.
- as soon as lilies
 - lilies
 - of lilies
 - by the time lilies start
26. dugout canoes where the floodplains have dried
into long stretches of dry sand.
- Because oxen pull
 - Oxen pull
 - For oxen to pull
 - Oxen pulling
27. Like a mountain, the Empire State Building creates its own
updrafts, have been observed to fall up.
- and snow and rain
 - snow and rain
 - of snow
 - but snow
28. perceives the color black ~provided there is a
complete lack of stimulation of the retina.
- When a person
 - A person will
 - If a person
 - A person
29. Elephant poaching the international ban on
ivory was established.
- has diminished since
 - it has diminished
 - since diminishing
 - it has diminished since

30. A little fat is essential for humans retain body heat, gives muscles energy, and keeps skin soft.
- as it helps
 - although it
 - it helps
 - in helping
31. Gustave Eiffel is famous for building the Eiffel Tower, for designing the framework of the Statue of Liberty.
- he is remembered
 - is remembered
 - yet he is seldom remembered
 - yet remembered
32. Further changes in the celestial constellations the International Astronomical Union has been formed.
- are unlikely now that
 - unlikely whenever
 - are unlikely
 - they are unlikely
33. can consume 30,000 plant species, 90 percent of the human diet consists of only 20 of the available species.
- Humans
 - In contrast humans
 - Providing for humans
 - While humans
34. The reservoir created by the Three Gorges Dam will flood almost 1,400 villages, to relocate the villages' nearly two million inhabitants.
- the government plans
 - so the governments plans
 - so the government plans
 - the governments plans

35. walking properly and has enough area to walk in, it should wear down the hoof as it regrows.
- a. If the animal is
 - b. The animal is
 - c. Although the animal
 - d. Although
36. Change, both good and bad, can create stress,, if sufficiently severe, can lead to illness.
- a. and stress
 - b. and stressed
 - c. stress
 - d. that stress
37. Caffeine is primarily consumed in coffee and tea, also found in cocoa, cola, and other soft drinks.
- a. But
 - b. but it
 - c. but it is
 - d. it is
38. farmers extra hours of light by which to harvest crops before frost and winter come.
- a. The harvest moon
 - b. Whenever the harvest moon allows
 - c. During the harvest moon
 - d. The harvest moon gives
39. built in 1931, the Empire State Building has actually shrunk six inches.
- a. It was
 - b. Because it
 - c. Until it was
 - d. Since it was

40. For every disease-carrying toxin, there is an antitoxin which out the effect of the toxin.
- Cancels
 - the cancellation
 - to cancel
 - cancelling
41. Galileo's observations of the phases of Venus proved formed the center of the planetary system.
- that the Sun
 - the Sun is
 - it is the Sun
 - what is the Sun
42. Skin color is determined by a chemical called melanin, in greater or lesser amounts.
- which human skin contains
 - human skin contains
 - in human skin contains
 - there is in human skin
43. Environmentalists are earnestly trying to determine of the ozone layer over the poles.
- is causing the deterioration
 - what the cause of the deterioration
 - what is causing ~the deterioration
 - the deterioration is causing
44. Historical records were used in China for centuries before spreading to Europe.
- suggesting that fireworks
 - fireworks
 - that fireworks
 - suggest that fireworks

45. The first mention of the cultivation of tea in a Chinese dictionary which dates about the year 350.
- Finding
 - to be found
 - it is found
 - can be found
46. The anteater has a long sticky tongue, capture ants and termites from their nests.
- which the use
 - uses it to
 - it is used
 - which it uses to
47. global climate is warming has been well documented.
- There is the
 - It is the
 - The
 - That the
48. Bank employees collect worn-out dollar bills, to a central office to be destroyed in a furnace.
- who send them
 - which are sent
 - who are sent
 - are sent
49. such a challenging science is that all theory is based on observations that cannot be replicated in a controlled environment.
- It is astronomy
 - Astronomy is
 - What makes astronomy
 - Why is astronomy

50. The blue-ringed octopus, found in tropical lagoons, is so venomous that it can paralyze or kill a person in a matter of minutes.
- a. is
 - b. who is
 - c. that
 - d. which is
51. floats or sinks is determined by its density rather than its weight.
- a. Whether an object
 - b. An object if it
 - c. Because an object
 - d. An object
52. Edmund Halley, who had discovered Halley's comet in 1682, before he could again see the comet whose return he had accurately predicted.
- a. died
 - b. dying
 - c. on his death
 - d. to die
53. Bees perform a complex dance other bees about the location of a good source of nectar.
- a. tells
 - b. tell
 - c. it tells
 - d. that tells
54. Some radioisotopes which as radioactive waste are now being used in experimental cancer therapies.
- a. once discarded by scientists
 - b. scientists discarded
 - c. to discard by scientists
 - d. were discarded scientists

55. Although seismologists know, they are unable to predict with accuracy when or where a tremor might occur.
- what causes earthquakes
 - what earthquakes
 - causes earthquakes
 - that the quaking of the Earth
56. The abundant grain harvests of North America can be credited to Norman Borlag, a little-known scientist modern strains of high-yield wheat.
- which cultivated
 - cultivated
 - who cultivated
 - the cultivation of
57. in the atmosphere is the temperature falling below freezing.
- Frost is produced
 - Frost produces
 - What produces frost
 - What is frost
58. Subduction is the process the ocean floor recycles itself.
- That
 - which is
 - by which
 - how
59. in so perfectly with their environment is what makes Frank Lloyd Wright's architecture so distinctive.
- That the buildings blend
 - The buildings blend
 - Since the buildings blend
 - Build and blend

60. The surgeon operating without delay on an inflamed appendix a far more serious complication, which is the rupture of a germ-laden appendix.
- which prevents
 - preventing
 - prevents
 - prevention
61. Unless as injury-free as possible, older athletes can have their activity and quality of life affected.
- the remnants of
 - to remain
 - remaining
 - remain
62. famous civil rights leader, Martin Luther King, Jr. was named winner of the Nobel Peace Prize in 1964.
- A
 - Which was
 - He was a
 - Was a
63. The four-character drama {Who's Afraid of Virginia Woolf?} , by Edward Albee, opened on Broadway.
- it was written
 - who was written
 - written
 - was written
64. After seven years to journey to Saturn, the spacecraft {Cassini} will spend four years exploring Saturn, its rings, and its icy moons.
- takes
 - taken
 - was taken
 - taking

65. Although applied for in October of 1793, Eli Whitney's patent for his cotton gin until March of the following year.
- Granting
 - it was not granted
 - to grant
 - was not granted
66., honoring the African tradition of celebrating the harvest, is held December 16 through January 1 in the United States.
- For Kwanzaa
 - Kwanzaa was celebrated
 - Kwanzaa celebrations
 - Kwanzaa
67. While repositioning, cruise ships passengers for what is called a line voyage.
- the embarkation of
 - embark
 - embarking
 - they embark
68. New York and New Jersey, the George Washington Bridge opened to traffic in 1931.
- Connecting
 - Which was connected
 - Connects
 - It connects
69. While those who are not working members of the press, press pins provide access to a press box for media members.
- | | |
|---------------|-----------------|
